

ABSTRACT

The invention provides a method for creating a garland of popped seeds, a method for creating a string of unpopped seeds, and a method of manufacturing such a string. The method includes stringing a plurality of unpopped seeds and applying energy to the plurality of unpopped seeds. Another embodiment is directed to stringing a plurality of unpopped seeds on a string and organizing the seeds on the string to enable popping of the unpopped seeds by applying energy. The seeds can be popcorn seeds or any other seed that is capable of popping.
